PROFILE

Software Engineer with over 5 years of experience designing, developing, deploying and maintaining scalable, flexible, reliable and high-performance web applications. Strong experience in **ReactJS (hooks, class components)**, **NextJS (CSR, SSR, SSG)**, **JavaScript**, **TypeScript**, **HTML5**, **CSS3**, **Tailwind CSS**, **Design System (Material UI)**, **Styled Components**, **React-related libraries (Redux, Context API, React Router DOM)**, **component architecture** and also **coding patterns**. Experienced in backend technologies (**NodeJS**, **Python**, **PostgreSQL**, **AWS**, **Docker**), enabling effective collaboration within cross-functional teams and architect fullstack solutions. Served as **Technical Lead** at **Samsung Electronics'** R&D Institute (SIDIA), managing projects and leading teams. Currently working as a **Senior Software Engineer** at VoiceDrop, where I am actively leading the development of two key solutions: **a credit card subscription payment system** and also **an interactive voice response system that streamlines customer interactions and automates call routing** – integrating **RESTful APIs**, **Stripe**, **AWS** and **CI/CD pipelines**. Experienced in **technical leadership**, **code reviews**, **distributed architecture (AWS, microservices, microfrontend)** and **component architecture**, focusing on **accessibility**, **scalability** and **high performance**.

EDUCATION

Bachelor of Science and Technology (BSc)

Universidade Federal do Rio Grande do Norte

January 2013 - July 2017

EXPERIENCE

VOICEDROP

Senior Software Engineer (Web) | March 2025 – Present

- Lead the development of scalable, flexible and high-performance web applications, using **component-based architecture** with **ReactJS**, **TypeScript**, **Tailwind CSS**, **Design System (Material UI)** and other React-related libraries (**Redux**, **Context API**, **React Router DOM**).

- Develop and also maintain a subscription system with the integration of **RESTful APIs** and **PostgreSQL**, optimizing efficiency in weekly and monthly payment processing.
- Work on the development and also maintenance of an **Interactive Voice Response (IVR) system**, streamlining end-user interactions through call flow routing.
- Define **architectural patterns** and **best coding practices**, conducting **code reviews** and **unit and integration testing**, focusing on quality and consistency.
- Manage **AWS infrastructure (EC2, S3, Lambda)** by using **Docker** and **CI/CD pipelines**, ensuring reliable deployments in scalable cloud environments.

SAMSUNG ELECTRONICS - SIDIA

Software Engineer (Web/Android) | April 2021 – May 2024

- Served as a **Technical Lead** and **Fullstack Engineer** in the Automation Team, defining **architectural patterns**, **componentization practices** and conducting **code reviews**.
- Designed and developed **Dashboards** using **ReactJS**, **ChartJS**, **TypeScript** and **Material UI**, consuming **RESTful APIs** and displaying real-time quality and performance data.
- Implemented **automated systems** that validate the integration of carrier-specific features on **Samsung devices**, ensuring **reliability** and **compliance**.
- Developed a solution for running **automated test suites (unit, integration and functional)** across multiple **Samsung devices**.
- Led **Samsung's LATAM team** in the implementation and delivery of **STIR/SHAKEN** and **RCD** solutions in Brazil – unifying development, QA and product teams across regions worldwide.
- Performed **troubleshooting** and **bug fixing** in Samsung native Android applications (Dialer, InCallUI, Contacts, Messages, TelephonyUI, Settings) through log analysis.

LOGICA SISTEMAS DE INFORMACAO EIRELI

Fullstack Developer (Web) | August 2019 – November 2020

- Developed **responsive user interfaces** using **ReactJS**, **JavaScript**, **HTML5** and **CSS3**, ensuring **accessibility**, **scalability** and **high performance**.
- Designed and implemented **responsive Dashboards** for monitoring IPv4/IPv6 and also CDN/Non-CDN traffic, consuming data via **RESTful APIs** and displaying real-time metrics.
- Designed and maintained **RESTful APIs** for **collecting** and **processing** large IPv4/IPv6 and CDN/Non-CDN traffic **datasets**, optimizing the data analysis process.
- Developed **microservice** that provides periodical reports on IPv4/IPv6 and CDN/Non-CDN traffic, enabling data-driven decision making.
- Implemented **microservice** for periodic data backup and **PostgreSQL** database optimization, increasing **reliability** and reducing **operational costs**.

SKILLS

- **Frontend:** JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Design System (Material UI), Styled Components, Bootstrap UI, ReactJS, NextJS, Redux, Context API, React Router DOM.
- **Backend:** NodeJS, Python, Django, Flask, SQL (PostgreSQL), NoSQL (MongoDB), RESTful API.
- **DevOps & Cloud & Tools:** CI/CD, Docker, AWS, Git (GitFlow), Linux, NPM, Yarn.
- **Distributed Architecture & Good Practices:** Architectural Patterns (MVC, Microservices, Microfrontends), Design Patterns, Code Review, Object Orientation, SOLID Principles.
- **Unit, Functional and Integration Testing:** Vitest, React Testing Library, Postman, Eclipse.
- **Agile Methodologies:** Scrum, Kanban, Scrumban.
- **Leadership & Soft Skills:** Technical Lead, Adaptability, Communication, Teamwork.
- **Languages:** Advanced English Level (C1) - Experience working in global teams.
