SUMMARY

I am actively seeking job opportunities that allow me to collaborate on impactful, large-scale and innovative software engineering projects, as a Fullstack or a Frontend Engineer, and in a collaborative environment that fosters professional and personal growth through goal-setting, continuous learning and strong knowledge and experience sharing.

EDUCATION

Bachelor of Science and Technology (BSc)

Universidade Federal do Rio Grande do Norte

January 2013 - July 2017

EXPERIENCE

VOICEDROP

Senior Software Engineer (Web) | March 2025 - Nowadays

- Design, implement and maintain responsive user interfaces, RESTful APIs and database for scalable and reliable web applications.
- Design, implement and maintain a subscription-based system to process weekly and monthly payments for recurring plans.
- Design, implement and maintain an Interactive Voice Response system for customer interactions and automating call flow routing.
- Integrate Stripe's public APIs as an external payment gateway to enable seamless and secure credit card transactions.

SIDIA INSTITUTO DE CIENCIA E TECNOLOGIA

Software Engineer (Web/Android) | April 2021 - May 2024

- Principal Fullstack Engineer and Technical Leader for the Automation Team (Tools: PLM Reporter, TRO.IA and PLMN).
- Design, implement and maintain an analytics system containing Dashboards and Statistics to monitor real-time data (KPIs).
- Design, implement and maintain systems that validate the integration of carrier-specific features in Samsung devices.
- Technical Leader for the Samsung LATAM team responsible for developing and delivering STIR/Shaken and RCD solutions in Brazil.

LOGICA SISTEMAS DE INFORMACAO EIRELI

Fullstack Developer (Web) | August 2019 - November 2020

- Design, implement and maintain Dashboards to monitor IPv4/IPv6 and CDN/Non-CDN traffic data, enabling effective data analytics.
- Design, implement and maintain internal APIs to collect and process IPv4/IPv6 and CDN/Non-CDN traffic data from Internet Providers.
- Design, implement and maintain a system that generates IPv4/IPv6 traffic data reports, empowering reliable data-driven decisions.
- Design, implement and maintain microservices responsible for automating periodical data backup and VACUUM in database tables.

SKILLS

- Technologies: JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, React, Next.js, Redux, ContextAPI, Material UI, Node.js, Python, Django, Flask, PostgreSQL, MongoDB, Docker, AWS (EC2, S3, Lambda), Git and Linux.
- Frontend unit testing using Jest and RTL.
- API Testing with Postman or Eclipse.
- Agile Methodologies (Scrum, Kanban and Scrumban).
- Technical Leadership and Project Management.
- Teamwork, Proactivity and Communication.
- Analytical reasoning for problem solving.
- Advanced English Level (C1).
